

Fire Prevention Week

HEATING SYSTEMS REQUIRE CHECK

To avoid unnecessary hazards during the rest of the winter heating season Saskatchewan householders have been urged to have heating systems checked and repaired by qualified service men if this has not been done.

H. R. Lester, natural gas distribution superintendent for the Saskatchewan Power Corporation, said recently this is important for all types of heating systems, including natural gas units. Any mechanical fault or obstruction in any heating unit will impair its efficiency and cause unnecessary problems, he pointed out.

"All approved types of heating units have certain design specifications, which must not only be met on installation but maintained throughout their operation if they are to remain fully efficient," Mr. Lester said.

"As far as natural gas units are concerned, every one is completely and carefully inspected after installation, and our service crews are available on call thereafter. However, as with other types of furnaces, all householders should have heating systems checked periodically, and in attending to this there are several steps which they can undertake themselves.

Simple checks
"These include making simple checks of the motor, pilot flame burner throat, fan and fan belt filter, humidifier, chimney, and overall action of the furnace. Making these checks yourself can give you a fair idea of what servicing may be needed, and enable you, if yours is a gas furnace to call an SPC serviceman when required."

Mr. Lester pointed out that a household could check the furnace

motor for lubrication instructions, finding out what to do if it does not happen to be a perfectly lubricated type. Checking the size and texture of the pilot flame, and the flame at the burner, would also reveal any change from normal and thus any need for servicing. Fan bearings could be checked to see if they needed lubrication and the fan belt inspected for any sign of strain or wear which might call for adjustment or replacement.

Filters could readily be checked and cleaned or replaced and the humidifier inspected for leaks or scale accumulation which would prevent it from working properly. Possibility of any chimney blockage should also be checked and in many instances this can be done by holding a mirror in the chimney cleanout at an angle which would permit sighting up the chimney. General action of the furnace could be tested by turning up the thermostat and watching the unit in operation for a short time, when any irregularities should be readily noticeable.

However, the customer should not hesitate about calling the SPC serviceman or his own equipment supplier or repairman, if he has any difficulty in making checks, or if he suspects or discovers any faults. Mr. Lester said a complete check should be made at least once a year, and preferably before the winter heating season.

Emphasizing the importance of a thorough pre-heating season check, Mr. Lester referred to two recent heating system difficulties, both encountered in Saskatoon. In one instance, a gap which had developed in the heat exchanger of a furnace installed several years ago had resulted in incomplete combustion and subsequent escape of carbon monoxide fumes into

Teach Children Fire Safety Early!

Children should be taught at an early age to respect fire not fear it. They should be made aware of its uses and benefits, and also its dangers. They should be urged to cooperate in the family job of fire prevention. Remember, children, like adults must be taught fire safety. Their lives depend on you!

**DON'T GIVE FIRE
A PLACE TO START!**

Message from the Minister

Regina, Sept. 28, 1959—Alarm over the increase in fires and the number of fire deaths in Saskatchewan was expressed on the eve of Fire Prevention Week — October 4th to October 10th, by the Hon. C. C. Williams, Minister of Labour, and Minister in charge of the Fire Prevention Act.

Figures for fire losses for the year ending December 31, 1958, were released today by Mr. Williams. "Deaths in Saskatchewan resulting from fires totalled 34 — six more than the 10 year average of 28 fatalities. Twenty children, four women, and 10 men died because of fires during this period," he said.

Property losses of \$3,980,047 for this period, showed a sharp increase of 9.3 percent over the previous year. These losses resulted from 2,215 reported fires — which represents a 25 percent increase over those reported in 1957.

The careless handling of flammable liquids resulted in injuries to 39 persons. Despite the warnings through press, radio, and TV, people continue to use gasoline as a cleaning fluid, and a quickener of fires.

"I cannot emphasize too strongly that gasoline is for driving cars or trucks — not for cleaning clothes or floors, or starting stove fires," the minister pointed out.

"We are fortunate in Saskatchewan in having one of the lower fire losses across Canada," he said, "but if we are to maintain this record our citizens will have to show a greater interest in eliminating hazards around the home. Reports consistently show that residential fires account for over 80 percent of the total reported."

On the eve of Fire Prevention Week a concentrated effort is planned to draw attention to the numerous fire hazards in the home. "The general public must be more aware of the dangers which often result in injury and tragedy," said Mr. Williams.

"I would urge that all citizens think about the consequences of careless fire habits, and teach their children the fundamentals of fire prevention and safety rules in the home."

With co-operation of citizens in teaching and setting a good example, I am sure that we can make the home a safer place to live in," the minister concluded, "and that we can be successful in reducing the fire loss and the number of deaths by fire during the coming year."

HON. C. C. WILLIAMS
Minister of Labour

Careless smokers cause many fires

Careless smoking caused almost half of the total number of fires last year.

"These fires were caused by carelessness while smoking. No cigar, cigarette or pipe will start a fire unless handled by careless people."

Smokers should exercise caution while smoking, and follow these suggestions:

1. After lighting a cigarette, cigar or pipe, make sure the match is out before disposing of it. Never throw a match into a waste paper basket or out of the window of a car. Although the flame may appear to be out, a partially extinguished match could ignite paper or dry brush and cause a serious fire.

2. Be careful where ashes are placed. Use ash trays only. Never use make-shift ash trays such as paper cups, cloth or any other inflammable material.

3. Be extremely careful when disposing of cigarette butts. Press them firmly into the ash tray until all the glowing embers are extinguished. Pipe smokers should be

extremely careful when knocking out the embers in their pipe.

4. Be careful where a lighted cigarette or cigar is placed. Always place them well in on an ash tray so if forgotten they will not drop off and cause a fire. Never place butts on a windowsill, the edge of a desk or similar places. Never have a cluttered desk with an ash tray on it—in haste you may inadvertently lay papers on top of the ash tray and start a fire.

"Remember these tips always when smoking and you will help prevent the needless fires caused by carelessness."

SERIOUS DRAIN

Edmonton, Alta.

The serious drain on the human and material resources of Alberta through destruction by fire can be reduced with the co-operation of all residents of the province.

The annual Fire Prevention Week is designed to refocus the attention of Albertans on precautions and safeguards for which they are responsible to ensure the safety and well being of themselves and their neighbors. I urge province-wide observance of the principles and recommendations of National Fire Prevention Week.

Hon. E. C. Manning,
Premier.

Worry of FALSE TEETH Slipping or Irritating?

Don't be embarrassed by loose false teeth slipping, dropping or wobbling when you eat, talk or laugh. Just apply a little **FALSEE** tooth powder. This pleasant powder gives a secure, comfortable, and confident fit. No sticky, messy, or irritating pastes. No false teeth slipping, dropping or wobbling. Get **FALSEE** as any drug counter.

If You're TIRED ALL THE TIME

Now and then everybody gets a "tired-out" feeling, and may be bothered by backache. Perhaps nothing seriously wrong, just a temporary condition caused by urinary irritation or bladder discomfort. That's the time to take **Dodd's Kidney Pills**. Dodd's help stimulate the kidneys to relieve this condition which may often cause backache and tired feeling. Then you feel better, rest better, work better. Get **Dodd's Kidney Pills** now. Look for the blue box with the red band at all drug counters. You can depend on Dodd's.

GREATER FIRE PRECAUTIONS

Initial, Alta.—Are you aiding and abetting a fire hazard at your place of business, in your home or on your farm? Could your premises take a rigid inspection for fire safety and come through with a better than "passing mark"?

If you can answer both of these questions with a loud honest "yes" there is no reason for your reading any further. However, if your answer is a meek "no," then it is time that you swung into action.

Each owner of property, and each renter several times each year should take a few minutes to inspect his premises for fire safety. Checking of pipes, wiring, heating equipment, electric motors and other things are of top importance.

An inspection of your premises for fire safety now can easily save costly damage in the months ahead. Fire safety — like other forms of safety — is 90 percent common sense and 10 percent effort.

The protection of your family, the property of your neighbors and the safety of human life are each worth many times the effort entailed in making your home reasonably safe against fire.—The Province.

Use Your Head And Save It!

heating ducts causing residents of the house to become ill. In another home, a chimney blocked by bird's nests resulted in a buildup of carbon monoxide fumes which also caused discomfort to the residents.

Although both incidents occurred in homes which had natural gas furnaces, Mr. Lester pointed out that natural gas itself was not responsible for these difficulties, and that exactly the same thing would have happened with a defective furnace or chimney in a coal or oil operated system.

Real problem

The real problem in such cases, he said, regardless of the type of heating system in use, was that any faults could under certain conditions produce or concentrate volumes of carbon monoxide. This is a product which may be present to some degree in burning any fuel, but is reduced below harmful levels or completely eliminated when combustion conditions are efficient. However, it is more likely to be present if a heating unit is operating with a faulty combustion chamber or faulty venting.

Mr. Lester emphasized that carbon monoxide is a poisonous gas, while natural gas is not. While a concentration of as little as one-half of one percent of carbon monoxide would cause death if breathed for a few minutes in a closed room, even as much as 50 percent concentration of natural gas under similar circumstances would have no ill effects.

WATCH THAT IRON!

A woman left the pressing iron going and left the house, and a short while later the house and a next-door garage were destroyed.

News Report From Edmonton

By Ken Mason

EDMONTON — Hasty observation on return to Alberta after two weeks in warmer climes: It's cold.

Not only that, but an unco-operative weatherman has dealt one of the heaviest blows in years to the province's farmers, according to reports compiled by the Alberta agriculture department.

Last week nearly 60 per cent of the wheat crop was still to be harvested. The Alberta Wheat Pool said continuing wet and cold weather has made the situation critical.

As the blizzard raged, worried farmers were kept off the land where only 36 per cent of the oats, 53 per cent of the barley, 81 per cent of rye and 36 per cent of flax crops were harvested.

The situation is the worst since 1954. Not since 1951 have farmers faced the prospect of having to let crops lie in the fields all winter.

The early arrival of winter also brought new headaches to Alberta roadbuilders, as if they hadn't had enough already, what with wet weather keeping crews idle during much of the construction season.

Highways Minister Gordon Taylor admitted last week that the heavy snowfall throughout most of the province had just about delivered the death blow to his record construction program and that there was no hope of completing it this year.

He said there's an outside chance this year's grading work may be completed if the weather clears, but asphalt surfacing and stabilized gravel base course work have all but stopped. This year's road program was to have been the biggest on record in Alberta, but from the outset it was plagued by work stoppages and lost shifts brought on by bad weather.

At week's end the only happy people were duck hunters who felt the cold weather and swirling snow would be just right to make the ducks fly down the old gun barrel.

ARRIVAL OF WINTER coincided with a government reminder to municipalities that the winter works encouragement program will be starting again this year, on Dec. 1.

Under the program, federal and provincial governments encourage municipalities to undertake special winter works projects by paying 75 per cent of labor costs. The federal government pays 50 per cent, the province 25 per cent. The idea is to stimulate winter employment.

Bill Ibsister, assistant chief municipal inspector for the government, will be administering the program in Alberta again this year. He reported last week that wages totalling \$2,138,000 were paid out last winter under the program. Of this, the federal government contributed \$1,069,000 and the province paid more than \$500,000.

The program provided 173,500 man-days of work during the winter season, but there is no way of telling how many of those man-days would have existed without the special program.

At any rate, it's a good deal for any municipal council which wants to save money on labor costs by working during the winter on road and sidewalk improvements, sewer and water facilities, park and playground development or bridges.

In addition to picking up a quarter of the labor costs, the province is willing to lend money to municipalities to help finance special winter projects.

THE CAPITAL CITY played host last week to some 300 delegates attending the annual convention of the Canadian Tourist Association.

One of the keynote speeches was given by Alan Field, director of the Canadian Government Travel Bureau, who said promotion of travel in Canada is inadequate. He warned that the Canadian tourist industry must set its sights higher if it is to succeed in "unparalleled competition" in the next decade.

Another of the main speakers was Premier Manning, who said tourism can neutralize current world-wide dangers and bring a closer bond of friendship among the nations of the world. "Tourist interchanges enable persons from many parts of the world to know, understand and appreciate each other and their problems," the premier said.

THE Homemaker

Trick or Treat:

The young in years and the young in heart are already making plans for Halloween parties, costumes, etc. When Halloween does roll around, delight those youngsters with Popcorn Balls or Caramel Canded Apples.

You don't have to make a batch of taffy to caramelize apples; just melt ready-made caramels and swirl apples in mixtures. The apples remain crisp and juicy.

If caramels aren't on hand in the cupboard, use:

2 cups of sugar
1 cup boiling water
¼ teaspoon cream of tartar
¼ cup vinegar

Boil water, sugar, cream of tartar and vinegar without stirring, until the syrup changes color slightly and is brittle when dropped in cold water. Remove from heat and place over hot water. Wash and polish small red apples, dip whole in syrup seeing that each is well coated with syrup. Remove from the syrup and place on waxed paper till hard.

Note: Red food coloring may be added to the syrup if you desire.

Non-Run Top and Toe Hosiery: The Corticelli Co. have a new "written guaranteed" line of hosiery on the market. If runs starting on the garter top or the toe, enter the leg area, the purchaser is guaranteed to a new pair of nylons free.

Lasticare: Is a new cold water shampoo designed specifically for elasticized fabrics. It claims to have solved the problem of laundering foundation garments, swimsuits, etc. Principle of the new laundry's work is that natural body oils are retained in elasticized fabrics during normal washing procedures. These body oils cause yellowing of the fabrics and early deterioration.

SAW SNAKES (From The Viking News)

Alf Hogstead, a young man we have been acquainted with for several years, and who played banjo with the Kuznicki Krackjacks orchestra when orchestral work was scarce in these parts, and whose integrity is above reproach, reported on Monday that he had seen a snake crawling on top of a snowdrift in the area north of Quinte School on Monday. The said snake had quite a time making headway in the snow but was doing a real rock 'n' roll, said Alf. Evidently the snake had been hibernating in a bank on a nearby hill, and as the snow started to melt, thought it might be spring and a good chance to make a meal off the odd butterfly or June bug. Alf, having compassion for the ambitious foot and a half long specimen that tempted Eve in the garden of Eden, just let him enjoy his frolic in the snow.

WE LIVE IN AN AGE

—Which thinks that being lost in the woods is a new freedom.

—Which, having made a mess of civilization, petulantly cries, "Why doesn't God do something about it?"

—Which, because it subtracts faith, multiplies fear.

—In which men demand education for their children, but decline discipline for themselves.

—When desire is deity and realization is futility.

—Which puts the highest premium on knowledge, but when it gets it, it does not know what to do with it.

—Which seems to think it has robbed death of its sting by transforming the cemetery into "memorial park."

—Which boasts of its unbelief instead of being ashamed.

—Which thinks a life daring which is only delicious.

—Which believes religious fakers and follows political quacks, but thinks itself too intelligent to accept the Word of God.

—When youth boasts it is hard-boiled when it is merely half-baked.

—Which prepares for everything, even for a "rainy day," but fails to prepare for eternity.

National Business Head

H. Gordon Love

H. Gordon Love, Calgary, who has been elected President of The Canadian Chamber of Commerce, at the national business organization's 30th Annual Meeting at Toronto on October 19, 20 and 21. He was formerly national vice-president of the Canadian Chamber. Closely associated with the life and fortunes of the Canadian West since shortly after the turn of the century, Mr. Love is president of "The Voice of the Prairies" Ltd., which owns and operates Radio Station CFCN in Calgary.

KILLAM ARENA IS CONDEMNED

The Killam Board of Trade has recently received notification from the Government Inspector that the Killam Arena has been condemned as a place of public gatherings. This ruling is in effect until the building is repaired to such an extent as to insure public safety.

The Board of Trade Executive has already had the Arena analysed by a professional engineer, and is prepared to carry out the repairs as required in his report. Specifically the following repairs are to be made:

New Arch Supports are to be extended and bolted with steel rings.

Arch Chords are to be re-nailed and strapped with steel strapping to prevent further lamination separation.

Arch Spans are to be braced with fir longitudinal bracing. Outside Portion of the Arch-ways to be covered to give complete protection from the weather.

This work is estimated to cost \$5,000.00 —Sedgewick Press.

That in Canada most consumer goods may be purchased for fewer hours of work than five years ago is shown by the fact that in the period the average manufacturing wage rose from \$1.40 to \$1.70, or by 21.7 per cent, while the consumer price index rose by only 9 per cent.

New Hog Carcass Grades:

The September 9, 1959 issue of the Canada Gazette carried the recent amendments to the hog carcass grading regulations, which will be effective on October 5, 1959. Minor additions have been made in the descriptions of carcasses eligible for the various grades, with the major change being that the previous B1, B2, and B3 grades will now be grouped in one "Grade B." Some changes in grade weights have been made, as will be noted in the comparison of the old and new grades weights below:

Grade	Old Wts.	New Wts.
Grade A	140 to 170	135 to 150 over 150 to 170
Grade B1	135 to 175 over	125 to 150 over
Grade B2	125 to 135 over	125 to 150 over
Grade B3	175 to 185	150 to 180
Grade C	120 to 185	125 to 189
Grade D	all weights	all weights
Gr. Light	under 120	90 to 125 over
Gr. Heavy	185 to 195	180 to 195
Gr. Extra	over 195	over 195
Ridlings, Stags & Sows	all weights	all weights

Note: Above figures are pound weights.

Rustlers Using the Latest Wrinkle

Word from the range country of the American south-west is to the effect that cattle rustlers have been using tranquilizer guns to shoot the new drug into cattle, to keep them quiet and submissive while being loaded into trucks for a quick get-away. What next?

CFRN To Give 24-hour 10,000 Watt Service

Edmonton, Oct. 13 — A double milestone in the operation of CFRN-Radio will be passed later this month, and a big double switch is being planned to celebrate the event.

Effective Sunday, October 18, Alberta's Radio Audience will be at the receiving end of the first 24-hour 10,000 watt Radio Service offered in this area. This power increase, from 5000 to 10,000 watts, will mark an important milestone in the growth of CFRN-Radio and its parent organization, The Sunwapa Broadcasting Company.

Coincidental with the switch to increased power is the Big Switch in Radio-TV operation on Monday, October 19, which will mark the opening event in a full week's celebration of CFRN-Radio's Silver Anniversary.

Announcers in the two divisions of the Sunwapa operation will switch duties — with the Radio staff announcing the television programs, and the T.V. announcers handling the Silver Mikes at the Radio Station.

Municipal Hospital Board Meet

Minutes of the Viking Municipal Hospital District Board meeting held in the Viking Hospital, Friday, October 9th, 1959, at 2 p.m.

Those present: H. Child, Chairman; B. B. Starky, A. L. Gibson, J. P. Rozmabel, Miss V. L. Day, Matron; J. P. Bolan, Secretary. Minutes of the previous meeting were read by the secretary, adopted as read and carried.

Business Arising from Minutes: 1. Mr. Child reported that the present auxiliary plant was loaded, and the pumps could not be hooked up to this plant. After considerable discussion in this regard it was moved and carried that this plant be for a used plant, this plant to be 110 volts and not less than 1500 watts.

2. The secretary reported that he had written to two firms with regard to an intercommunication system for the hospital, and had received word that a man would call to look over the situation. The secretary will report again at the next meeting. Committee Reports — Building Committee:

Mr. Child reported that he had been talking with C. W. Golka in regard to the hot water line in the new wing. Mr. Golka believes the line is of poor quality pipe, and suggested that the only possible solution would be to replace same with copper pipe. Mr. Child also pointed out that this would present quite a problem as the ceiling and walls would have to be broken up to reach the various sections. After considerable discussion it was decided that the committee would look into this further, and report at the next meeting.

Matron's Report was presented by Miss Day, accepted and carried.

Civil Disaster Plan — Miss Day reported that there was a very good turnout at the meeting in September, and a similar meeting will be held in the Hospital, October 19th, 1959, at 8 p.m., to which any interested persons are invited. Speakers from the Alberta Civil Disaster Unit will also be present.

Hospital Accreditation was discussed at some length, and it was moved and carried that Miss Day make inquiries in this regard.

Hospital Division Inspector — Mr. Protti from the Department of Public Health, Hospital Division, was at this hospital during September for a routine inspection, and found most aspects favorable.

Correspondence

1. A letter from the North-East St. Paul Regional Conference advising that the next regular meeting would be held at Smoky Lake, Thursday, October 15th, 1959 at 1 p.m. Moved and carried that any of the board members wishing to attend be able to go. The Matron and Secretary may also attend.

2. A letter from the A.H.A. advising that the 1959 convention would be held in Edmonton October 27-29th at the Jubilee Auditorium was read. Moved that B. B. Starky and A. L. Gibson be voting delegates, as this hospital is entitled to two votes. Miss Day and Mr. Bolan are to attend also. Mr. Child stated his intention of attending if possible.

Bills and Salaries totalling \$11,706.06 were approved for payment.

1960 Staff Policies — Miss Day presented the 1960 staff policies for review, and these were discussed at some length, and will be brought up again at the next meeting.

Fire Bells — The secretary reported that an offer of approximately 25% of the value of the bells had been made by Kleen Limited. Moved and carried that we sell the bells at the offered price.

Collection of Accounts — Moved and carried that the secretary use his discrimination in forwarding to the collectors accounts over six months.

Adjournment moved at 5:30 p.m. — J. P. Bolan, Secretary.

BLESSES GIANT STATUE — Vatican City — Pope John XXIII (behind prie-dieu) blesses a huge statue of the Madonna of Fatima here, prior to its being shipped to the United States. Workmen had to dismantle the 30-foot bronze statue in order to get it into the Vatican, where it was re-assembled for the Papal blessing. The statue, made by American sculptor Lumen Winter, will be erected in White Plains, N.Y.

Kinsella News

SHOWER

A bridal shower in honor of Mr. and Mrs. Malcolm McKie was held in the Memorial Hall on Wednesday evening, Oct. 7. Approximately fifty friends attended. An entertainment of contests was enjoyed. The bride and groom were then presented with many pretty and useful gifts. They were helped in opening them by Mr. and Mrs. Joe Makar. Mr. and Mrs. M. McKie thanked those present for their gifts.

The evening was brought to a close with the serving of lunch.

George Carpenter, Herb Armilidge from the U. of A. and Cleora Garvie of Edmonton, spent the weekend at their homes here.

Mrs. A. Loades left on Saturday for points in the U.S.A. Mr. and Mrs. Ken Helgason of Edmonton were visiting Mrs. Helgason's sister and brother-in-law, Mr. and Mrs. M. Walker for the holiday weekend.

On Sunday Oct. 11 in the absence of the Rev. C. Swallow, the regular church service was conducted by Mr. Denny Hougau of Edmonton, assisted by his wife, Miss M. K. Aldridge of Edmonton has been the guest of her cousins, Mr. and Mrs. J. F. Murray.

The WA of the Kinsella United Church will sponsor the annual chicken supper on Monday, October 19, commencing at 6 p.m.

MONEY IN POCKET

Canada's electrical manufacturing industry now pays more than \$321,000,000 annually in wages.

There are fifteen residential schools in Canada for blind and deaf children. In the 1958-59 school year the six schools for the blind have 624 pupils, the 9 schools for the deaf have 1,860 pupils.

"When we buy goods made abroad, we get the goods and the foreigner gets the money; when we buy goods made at home we get both the goods and the money." — Abraham Lincoln.

Farm Credit Act Proclaimed

OTTAWA, Oct. 13, 1959 — Canada's new Farm Credit Act, passed by Parliament during the last Session, went into effect Monday, October 5, the Hon. Douglas S. Harkness, Minister of Agriculture, announced.

The Act will succeed the Canadian Farm Loan Act, and all assets and responsibilities of the Canadian Farm Loan Board will be taken over by the new Farm Credit Corporation.

Under the new farm credit system, up to \$20,000 in loans will be made available instead of the previous maximum of \$15,000, for the purchase of a farm or farm improvement. Interest on the loans has been fixed at 5 per cent to make it more equitable to borrowers than a fluctuating rate.

Further, provisions are now more flexible. For example, a loan can be based on 75 per cent of the appraised value of the farm instead of 65 per cent. Tailored to meet the needs of the younger farmer, a new type of assistance — the supervised loan — can be made to applicants between 21 and 45 years, to allow them to set up an economical farm unit. This type of loan may be as high as 75 per cent of the appraised value of the farm and chattels, but may not exceed \$47,500.

Arrangements will be made to have district supervisors and field officers under the Veterans' Land Act assist the corporation with the supervision of these loans.

CLEAN STORAGE FOR GRAIN

The provision of insect-free, weather-proof buildings for the storage of new grain, does much to ensure that grain will not spoil. It will pay, therefore, to thoroughly clean and spray all bins that are to be used for grain storage. Such precautions pay real dividends.

SEARLE GRAIN COMPANY, LTD.

IN RCAF DRESS—This is the F-104 Starfighter, the aircraft chosen to re-equip Canada's NATO squadrons in Europe, as it will appear with RCAF markings. Expected to be in squadron service by 1961, the sleek jet will be produced in Canada by Canadair Ltd., and known as the CF-111. Able to scorch the sky in 3,000 mph bursts of speed and to zoom to the very fringes of space—91,243 ft.—the F-104 holds the world's speed and altitude records. Powered by the General Electric J-79 turbojet, the F-104 has been called a "missile with a man in it," for its razor-sharp wings protrude only seven feet from the fuselage on either side.

A wide variety of external armament, including nuclear weapons, can be carried by this relatively small aircraft.

Woman's Way

MADLEINE LEVASON

BEAUTY AND THE FARM

Farming and the cosmetic business may seem far apart, but one Canadian woman has made a success of both.

Elizabeth Arden whose name is synonymous with feminine beauty, is an active farmer as well as the head of an international beauty business.

Born on a farm at Woodbridge, Ont., she first took training as a nurse. This began an interest in health and beauty that eventually led to the creation of the huge cosmetic industry. Along the road to this success however, she never lost her love of the farm.

Early in her business career, Miss Arden bought a farm in Maine where she began raising purebred cattle and horses. She named the place "Maine Chance" and later, when her racing stable also became famous, she moved

Tenderloin birds

1½ pounds pork tenderloin
Prepared mustard
2 cups bread stuffing
4 slices side bacon
1 cup thin cream
1½ teaspoons lemon juice
Salt, pepper, paprika
Cut tenderloin into 3-inch pieces. "French" (flatten) to ½-inch thickness. Spread one side of each slice with a thin coating of prepared mustard then with ¼ cup of the bread stuffing. Roll and skewer. Cover each roll with a half slice of side bacon. Make 8 birds. Add lemon juice, salt, pepper and paprika to cream. Pour over rolls in shallow baking dish. Bake at 325 deg. F. until tender, about 1 hour.

Note: If desired omit cream, lemon juice, salt and paprika, and bake the birds in 1 can cream of celery soup diluted with ½ cup milk. Season with ½ bay leaf and ¼ teaspoon pepper but do not add any salt as there is sufficient in the soup.

The name to a new location in the Blue Grass country of Kentucky. No absentee owner, Miss Arden is out at 6:00 a.m. to check up on things before going to the New York headquarters of her cosmetic empire. A lover of all beautiful things she is also a dedicated gardener and a number of flowers have been named after her.

These interests do not seem so widely separated when one hears her simple philosophy. "Beauty begins within. Its foundations are good health and a peaceful mind." After all, someone else once said: "As a work of art I know few things more pleasing to the eye or affording more gratification to a taste for the beautiful than a well-studied, well-cultivated farm."

It's Halloween, and what could be more fun than a Ghost Party? Instruct your guests to come dressed as ghosts in old sheets and to practice their weirdest "Whooooooos."

Invitations can be made of white cardboard paper in the shape of a ghost, with goblin, or owl with an appropriate verse, time, place and date of the party.

For decorations be sure and carve a smiling face in your pumpkin and place a candle inside for your "window-all welcome." Have your lights dim or masked with skeletons, arched-back cats, witches on broom sticks, pumpkins, owls, skulls, etc. Have a dressmaker's figure draped in a sheet with a hand extended and when your guests reach out to shake the hand, step out from wherever you're hiding and weirdly welcome them as they grasp the figure's ghostly hand. The hand can have a glove filled with stuffing.

Have the ghosts step up one at

a time and have the rest of the guests discover who each one is without his removing his costume. The guest most difficult to recognize might be awarded a Halloween souvenir.

Next have the guests remove their sheets or costumes and shoes and stockings and then blindfold them and have them stand in a single line holding to the shoulder of the person ahead of them. Lead the ghosts on an eerie walk. First have them walk barefoot through a large tray or dish of uncooked rice. Next place some cooked macaroni in their hands; brand them with a red hot ice cube; then give them a taste of witchy brew (ginger ale) from a spoon. Then give them pieces of sheer fabric or better still—angel hair—should be dragged across their faces and hair to represent spider webs. Place in their hands some witches' eyes, made from skinned grapes.

Long strings of spaghetti (cooked) should follow next for the brains of the dead witches. A wet sponge could also be put into their hands. Have someone narrate a weird story to fit in with all the different things they touch and of course have spooky noises playing along with ghostly noises being made.

Give your guests an airplane

ride. Take two of your strongest male guests to assist. Blindfold all and take them into the room one at a time. The rider feels his hands upon the shoulders of one of the assistants holding each end about an inch from the floor. The guest will place his hands upon the shoulders of one of the assistants for balance; and this assistant will gradually kneel during the trip. As the rider feels his arms going down, he will think that he himself is being lifted very high. When the assistant has knelt all the way to the floor, and the rider feels he is tottering in

mid-air, someone will call, "Bail out," and the board will be tipped slightly for him to jump. The board, of course, is no more than four or five inches above the floor. Spooky tales are always good

at a Halloween party. Turn out the lights and have someone begin to tell a mystery story. At a particularly ghostly and tense part of the story, stop short, and let the person next to you continue the story. You might start out the story like this: "One Halloween night Trevor and Doug were walking home from their 'Tricks or Treats' and they decided they had better take the short cut through the graveyard because they had promised their mother and father to be home by 10 p.m. and it was already one minute to 10. Trevor and Doug started to run and Doug tripped over a gravestone, and all of a sudden he heard a most horrible 'Whoooooo' and there before him was - - - -". Then the next person must continue on with this same story.

The table decorations should consist of baskets made in the shape of pumpkins or black cats and filled with black and orange jelly beans and gumdrops or other Halloween candy. Serve spook cocoa with marshmallows floating

on top with blue food coloring faces painted on them. Or serve equal parts of ginger ale and grape juice and lots of ice in a bowl with slices of orange or lemon floating on top. Stick cloves in them to form pumpkin faces. For dessert prepare your favorite gelatin dessert and in each asherbet place a peach half. Make faces by pushing cloves, chocolate chips, or pieces of green cherries in the peach slices. Serve Jack-O'-Lantern Sandwiches by trimming slices of brown bread into round shapes. You make use a cookie cutter or a glass. Make sandwiches with a cheese spread filling. Add faces on top with eyes of raisins or sliced olives and popcorn for a mouth; or cut out eyes and mouth in the bread so that the cheese shows. Slices of brown and white mixed make attractive looking sandwiches. Spread the white bread with peanut butter and the brown bread with cheese and have four alternate layers and then cut into ribbons. Scoops of ice cream with faces made with chocolate chips are also nice. End the party with platters of homemade maple cream and chocolate fudge candy.

FACTS ON ARTHRITIS

Even a dog can become arthritic—Medical researchers find

A dachshund is more to be pitied than laughed at. That sausage-shaped back not only invites ridicule—it's a health hazard besides, says The Canadian Arthritis and Rheumatism Society.

According to recent information from rheumatism researchers, dachshunds are susceptible to degenerative disc disease which produces symptoms like those in rheumatic diseases in humans—and it's all on account of their funny figure.

When a dachshund gets old, he usually gets fat, and because he has a poorly constructed back—from the mechanical point of view—the extra weight pulls down his spine and bends it. This squeezes the discs and brings on the disease.

The first sign the dog is in for trouble usually is his inability to climb stairs. He'll jump at them, but his hind legs won't follow his forelegs, because they hurt when he tries to move them. So he'll just sit there looking at the stairs forlornly.

After that, when the disease has progressed a little further, his tail begins to droop and finally the poor animal will suffer complete paralysis of his hind quarters.

Unless he undergoes surgery, he's doomed.

Other than surgery, the only treatment is rest—or a cast. The medical men have found they can design a little plaster jacket which serves as an admirable cast.

A dachshund is not the only animal in which arthritis researchers have found conditions resembling the rheumatic diseases—man's oldest known disease.

Beagles, for instance, get old age arthritis of the hips because of the unusual shape of their old joints at birth—and they respond by treatment by hydrocortisone just like their arthritic masters.

And boxers, Boston pups and English bulls—in fact all straight-legged canines—are susceptible to this malady because of the continual hammering at their hip joints when they walk or run.

Dalmatian coach hounds have been found with a kidney disease leading to accumulation uric-acid which causes gout in humans by leading to deposits of urate material at the joints. But so far the hounds haven't been known to develop gout. Contrary to the age old belief, arthritis researchers say that alcohol does not cause gout, but since stress and alcohol are "bad" in humans, the might be speculated that the hounds are safe because they don't play the stock market and drink wine.

Poodles, it seems, must pay for their pride. They often suffer fallen arches as a result of the strain they put on their feet with their high-stepping gait.

And even those patriotics—race horses—are not immune to occupational hazards. They can get arthritis. One specialist tells of a horse he knows with the disease which won a race after being dosed up with cortisone.

One of the latest findings of ar-

thritis researchers—and one of the most interesting—is the discovery in spine of a disease like chronic arthritis which seems to be caused indirectly by erysipelas, a highly contagious virus disease.

Before the advent of antibiotics, erysipelas occurred in great numbers of animals—goats, chickens, turkeys, horses, mice and swine—and caused a serious skin disease.

Although it is practically nonexistent in Ontario and most other parts of Canada, it still occurs sometimes in Manitoba and is common in the U.S. Midwest, where it is one of the major reasons for condemning pigs.

In a study made at Lafayette University, Indiana, researchers found that one-third of the pigs surviving an infection of erysipelas contracted a disease resembling arthritis in man—the most serious of the rheumatic diseases.

The pain was so great among the arthritic pigs that they refused to get up even to eat, and simply lay down and died. The conscientious researchers were as anxious to keep them alive they slopped out into the mud every morning to pick the swine up bloodily and lead them to the feed trough.

Clinically and microscopically, the disease closely resembled the human affliction, but there are both differences and unknown factors. Rheumatoid arthritis in humans usually occurs in full maturity, while in pigs it starts in youth. Pregnancy causes symptoms in humans—but not in the afflicted pregnant pigs.

The Canadian Arthritis and Rheumatism Society explains that the medical researchers have more than just idle curiosity about these rheumatic-type diseases in animals. They're not just studying them for fun.

Rheumatic diseases, says the Society, are responsible for great suffering and economic losses all over the world, yet no one knows what causes them or how to cure them.

What research men learn about similar diseases in animals might help them to find out.

How To Hold FALSE TEETH More Firmly In Place

Do your false teeth annoy and embarrass by slipping, dropping or wobbling when you eat, laugh or smile? Just sprinkle a little PASTEETH on your gloves. This alkaline (non-acid) powder holds false teeth more firmly and more comfortably. No gummy, gooey, sticky taste or feeling. Does not stain, discolor, or denture. PASTEETH today as any drug counter.

Why risk this? **PAY YOUR 1960 HOSPITALIZATION TAX** before November 30, 1959

1960 RATES

- For each self-supporting person or a spouse (including a widowed, divorced or separated person) \$17.50
- For each person who reaches the age of 18 years before January 1, 1960 (except unmarried dependents under 21 years before January 1, 1960, who are attending educational institutions or training at a school or nursing, and sons and daughters dependent on parents for maintenance by reason of physical or mental infirmity) \$17.50
- Dependents who will not reach the age of 18 years before January 1, 1960, are not taxable.
- Dependents who are exempt from taxation must be shown as beneficiaries on family hospital services cards.
- The family tax for a family head, his spouse and his non-taxable dependents is \$35.00

If your tax is more than \$17.50 you may pay that amount as a first instalment by November 30, 1959—and the balance by May 31, 1960.

PAY AT THE SHIP TAX COLLECTION OFFICE OF THE CITY, TOWN, VILLAGE, RURAL MUNICIPALITY OR LOCAL IMPROVEMENT DISTRICT IN WHICH YOU LIVE.

SASKATCHEWAN HOSPITAL SERVICES PLAN

Versatile!

If you bake at home, here's a delightful orange bread to butter or toast or make into exciting sandwiches. Make it with Fleischmann's Active Dry Yeast. It's the best!

Rich Orange Bread

- Measure into large bowl ½ cup lukewarm water
2 teaspoons granulated sugar
Sprinkle with contents of 2 envelopes Fleischmann's Active Dry Yeast
Let stand 10 minutes, THEN stir well.
- 2 well-beaten eggs
½ cup granulated sugar
2 teaspoons salt
¼ cup soft butter or margarine
2 tablespoons grated orange rind
1 cup orange juice

- 2½ cups once-sifted all-purpose flour and beat until smooth and elastic. Work in additional 2½ cups (about) once-sifted all-purpose flour.
- Turn out on floured board and knead until smooth and elastic. Place in greased bowl. Grease top. Cover. Let rise in warm place, free from draft, until doubled in bulk—about 1½ hours.
- Punch down dough. Turn out on lightly-floured board and knead until smooth. Roll the dough shape into loaves. Place in greased loaf pans (8½ x 4½ inches, top inside measure). Cover. Let the oven double in bulk—about 1 hour. Bake in a hot oven, 400°, about 35 minutes. Yield—2 loaves.

Local News

Born to Mr. and Mrs. Louis Fomal, the former Connie Owen, at the Viking Hospital on October 8th, a son.

Mrs. A. A. Fischer returned home last weekend after a most enjoyable visit with relatives in Eastern Canada. Her brother, Gordon Pettigrew of Millet, is visiting with her now.

Mr. and Mrs. Wm. Boyd have moved from Irma to spend the winter months in Wainwright. Mr. and Mrs. F. Lang and children of Millet spent Thanksgiving here at the home of his mother, Mrs. F. J. Lang.

Mr. and Mrs. R. Lewis and children of Hayter have moved into the Searle Grain Elevator house in Irma where Mr. Lewis will be the new agent.

Mr. and Mrs. Fred Daniels of Edmonton spent Thanksgiving here with his parents, Mr. and Mrs. W. Daniels. Miss Linda Daniels was also home for the holiday weekend.

The October meeting of St. Mary's WA will be held at the home of Mrs. H. Cockcroft on Thursday the 22nd at 2:30 p.m.

Miss Nellie Cairns is taking a course at the Prairie Bible Institute at Three Hills, Alta.

Mr. and Mrs. Donald Horn and family from Calgary were weekend visitors at the home of his mother, Mrs. Gerald Scott. A family gathering was held at the Scott home on Thanksgiving Sunday.

Mr. and Mrs. Gordon Inglis of Westlock, Hugh Inglis of Calgary and Miss Winnifred Davies of Vauxhall were Thanksgiving guests at the home of Mr. and Mrs. H. W. Inglis.

Among our University students home for Thanksgiving were Les Ballentine, Joe Rohrer, Lorraine Smallwood, Laraine Pond and Clara Brokop.

Congratulations and best wishes to Mr. and Mrs. Arthur Elliott, the former Emily Bauer, whose marriage took place in Edmonton on Saturday last.

Warmer weather is making us all feel a lot happier. It is surprising how quickly the snow has melted away. We are fortunate too, that the snowfall was lighter here than in most districts.

Mrs. Stan Murray was taken ill on Wednesday morning and is a patient in Wainwright hospital.

Rev. H. W. Inglis and Mrs. Martin Enger attended Presbytery at Kitscoty on Wednesday and Thursday of this week.

Big Hallowe'en Dance October 30

The L.O.B.A. are sponsoring a Hallowe'en Dance at the North Irma Community Hall on Friday evening, October 30. Music by Nissen's Orchestra. Admission: gents 75¢, ladies 50¢. Lunch will be served **2-23c**

75 SERVANTS

Since 1954, 25 electrical appliances have been added to the Canadian market, bringing the total to some 75, compared to 19 available in 1930.

Canada Helped Marconi

Marconi perfected wireless telegraphy in Nova Scotia at the turn of the century. Canada gave an \$80,000 grant to help with his experiment.

READ CLASSIFIED FOR RESULTS

AN OPPORTUNITY—Brush cutting and piling. D-8 Cat. Work guaranteed. Phone Russ Lehr, 43, Edgerton or write Box 472, Edgerton. 16-30p

FOR SALE—One 67,000 B.T.U. oil heater, thermo. control electric ignition. Apply Carl Anquist, Irma.

Jarrow News

Congratulations to Mr. and Mrs. Grant Lind whose wedding took place in Edmonton on October 10th. Mrs. Jamieson and Howard attended the wedding. We are sorry to hear that Mr. Tom Overbo is now a patient in an Edmonton hospital. We wish him a speedy recovery.

Mr. and Mrs. Bill Meakins, Shirley Anne and Douglas visited with relatives over the long weekend.

Mr. and Mrs. Frank Mayne and family of Sedgewick visited with her parents, Mr. and Mrs. Bob Meakins over the weekend.

Mr. and Mrs. Bud Beer and son of Castor visited at the H. Beer home the first part of the week.

Mr. and Mrs. O. Harris, who have spent the past two years at Anchorage, Alaska, where he is with the U.S. Airforce, are presently visiting at the home of Mrs. Harris' parents, Mr. and Mrs. Arthur Overby, enroute to Washington where he will be stationed.

Mrs. Gilbert Lovig is home after being a patient in Hardisty Hospital the past week.

Mr. and Mrs. Jim Soneff and family of Edmonton were weekend visitors with the C. Soneff's.

Mr. and Mrs. Ron Currie and family of Fort Nelson, B.C. were Sunday visitors at the M. Belton home.

NORTH EAST CORNER

Miss Mildred Carrington of Edmonton was a visitor at the Neil McMillan home.

Mrs. Bill Walker and daughter Janet returned home from the Mannville hospital.

Thanksgiving weekend visitors with their family were Regina Van Hyfte from University and Dan from Delburne.

Master Robin Prosser is a patient in the Mannville hospital. We wish him a speedy recovery.

On Tuesday, Ruth Oldham had a party to celebrate her tenth birthday. It was a real girl party, right down to the last giggle.

A lovely farewell party was held on Saturday evening in honor of our friends, Mr. and Mrs. Ted Dallow who are going to make their home in Edmonton. The good wishes of all go with them. Daughter Edna and her husband were here from Calgary too.

Our long awaited nice weather has arrived. Could it be Indian summer? Let's hope it stays now till the farmers can get their fall work completed.
